This Month’s Covers....

**Front Cover:** The Graphic is titled: Conceptual representation of a Solar System Internet built on Delay-Tolerant Networking technology. These graphics were created by the late Adrian Hooke, Jet Propulsion Laboratory (JPL) in Pasadena, California USA. They were provided by Scott Burleigh, JPL along with Ruhai Wang, Lamar University, Texas USA, to the memory of Adrian. From the very beginning, until his passing in January 2013, Adrian Hooke was the driving force behind NASA’s contributions to Delay-Tolerant Networking (DTN) research and the agency’s adoption of DTN for space flight missions. He can’t be replaced, and he won’t be forgotten. To read ~~an article for an~~ emulation-based study of DTN for deep space communications by Ruhai Wang et al., ~~see~~ pages 22-30.

**Back Cover:** ~~To Come~~

IEEE AESS Society

The IEEE Aerospace and Electronic Systems Society is a society, within the framework of the IEEE, of members with professional interests in the organization, design, development, integration and operation of complex systems for space, air, ocean, or ground environments. These systems include, but are not limited to, navigation, avionics, spacecraft, aerospace power, mobile electric power & electronics, military, law enforcement, radar, sonar, telemetry, defense, transportation, automatic test, simulators, and command & control. Many members are concerned with the practice of system engineering. All members of the IEEE are eligible for membership in the Society and receive the Society magazine *Systems* upon payment of the annual Society membership fee. The *Transactions* are unbundled, online only, and available at an additional fee. For information on joining, write to the IEEE at the address below. Member copies of publications are for personal use only.
