

CORRIGENDUM / RECTIFICATIF

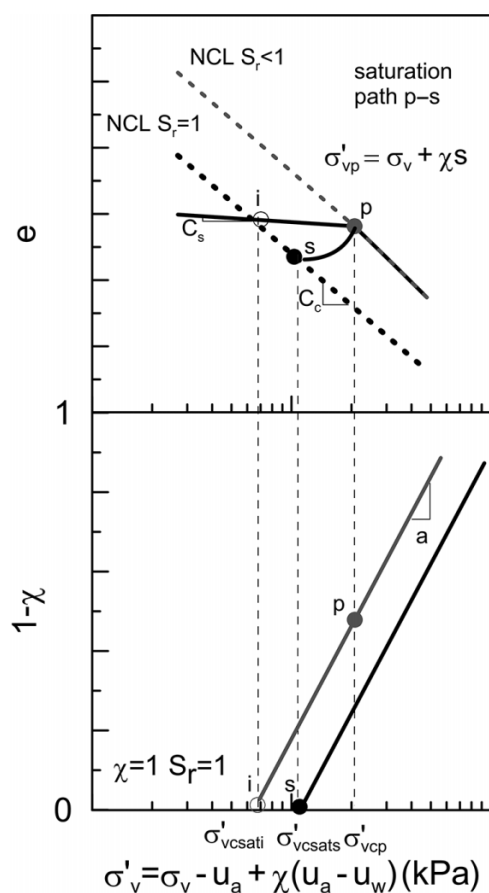

Corrigendum: Deformation induced by wetting: a simple model

Francesca Casini

Ref: Can. Geotech. J. 49(8): 954–960 (2012).

Figure 3 should be replaced with the following:

Fig. 3. Stress path followed by a point p to saturation s. Point i represents the saturated preconsolidation vertical stress of point p. Δe_{sat} is the variation of void ratio induced by saturation predicted by the model.

Received 30 July 2012. Accepted 30 July 2012. Published at www.nrcresearchpress.com/cgj on 3 August 2012.
