

Index	pag I
Chapter I : BIOSENSORS BASED ON ENZYME INHIBITION	
Preface	pag 1
GENERAL INTRODUCTION TO BIOSENSORS	
1.1 Definition of biosensors	pag 2
1.2 Biocomponent	pag 4
1.2.1 Enzyme	
1.2.1.1 Definition	pag 5
1.2.2.2 Enzyme by the “Commission on Enzyme Nomenclature of the International Union of Biochemistry”	pag 6
1.2.2.3 Michaelis Menten kinetics	pag 6
1.3 Immobilisation of the receptor component in biosensors	pag 10
1.3.1 Adsorption	pag 11
1.3.2 Physical entrapment	pag 12
1.3.3 Covalent coupling	pag 12
1.3.4 Cross-linking	pag 12
1.4 Structure and function of transducers	pag 13
1.4.1 Electrochemical transducer	pag 14
1.4.1.1 Amperometric biosensors	pag 14
1.4.1.2 Potentiometric biosensors	pag 14
1.4.1.3 Other electrochemical biosensors	pag 15
1.4.2 Optical transducers	pag 15
1.4.3 Piezoelectric transducers	pag 16
1.4.4 Thermal transducers	pag 17
1.5 Biosensor based on enzyme inhibition	pag 17

1.6 Cholinesterase	pag 20
1.6.1 The catalytic mechanism	pag 22
1.6.2 Irreversible inhibition of cholinesterase	pag 25
1.7 Enzyme inhibition kinetic	pag 26
1.7.1 Reversible inhibitors	pag 27
1.7.1.1 Competitive inhibitors	pag 27
1.7.1.2 Non-competitive inhibitors	pag 29
1.7.1.3 Uncompetitive inhibitors	pag 31
1.7.1.4 Mixed inhibitors	pag 33
1.7.2 Irreversible inhibitors	pag 34
1.8 Biosensor based on cholinesterase inhibition	pag 36
1.8.1 Cholinesterase inhibition	pag 36
1.8.1.1 Reversible inhibition	pag 37
1.8.1.2 Irreversible inhibition	pag 39
1.8.2 Parameters influencing the biosensor based on cholinesterase inhibition	pag 39
1.8.2.1 Effect of immobilisation	pag 39
1.8.2.2 Effect of enzyme concentration	pag 41
1.8.2.3 Effect of incubation time	pag 41
1.8.2.4 Effect of pH	pag 42
1.8.2.5 Effect of organic solvent	pag 42
1.8.3 Design of cholinesterase biosensors	pag 43
1.8.3.1 Three enzymes system	pag 44
1.8.3.2 Bi-enzymatic system	pag 44
1.8.3.3 Mono-enzymatic biosensor	pag 46
1.9 Thiocholine detection	pag 47
1.9.1 Methods of analysis for thiocholine detection	pag 47

1.9.2 Chemical, physical and electrochemical properties of Prussian Blue	pag 49
Concluding remarks	pag 53
A1 Appendix	
A1.1 Cyclic voltammetry	pag 55
A1.2 Amperometric methods	pag 56
A 1.2.1 Batch stirred amperometry	pag 57
A. 1.3 Electrode materials	pag 58
A. 1.3.1 Screen-printed electrodes	pag 58

Chapter II : EXTRACTION AND DETECTION OF PESTICIDES BY CHOLINESTERASE
INHIBITION IN A TWO-PHASE SYSTEM: A STRATEGY TO AVOID HEAVY METAL
INTERFERENCE

2.1 Introduction	pag 65
2.2 Experimental section	pag 67
2.2.1 Apparatus and reagents	pag 67
2.2.2 Measurement of thiocholine	pag 68
2.2.3 Reaction between thiocholine and heavy metals	pag 69
2.2.4 Measurement of the enzymatic activity in aqueous solution	pag 69
2.2.5 Measurement of pesticide in aqueous solution	pag 70
2.2.6 Measurement of the effect of organic solvents on enzyme activity	pag 70
2.2.7 Measurement of inhibition by pesticide present in organic solvent	pag 71
2.3 Results and discussion	pag 71
2.3.1 Reaction between heavy metals and thiocholine	pag 71
2.3.2 Principle of the method	pag 73
2.3.3 Characterisation of enzyme activity	pag 77

2.3.4 Effect of different organic solvents on enzyme activity	pag 78
2.3.5 Measurement of inhibition by paraoxon	pag 81
2.4 Conclusions	pag 83

Chapter III: DETECTION OF CARBAMIC AND ORGANOPHOSPHOROUS PESTICIDES IN WATER SAMPLES USING A CHOLINESTERASE BIOSENSOR BASED ON PRUSSIAN BLUE MODIFIED SCREEN PRINTED ELECTRODE

3.1 Introduction	pag 88
3.2 Experimental section	pag 90
3.2.1 Apparatus	pag 90
3.2.2 Electrodes	pag 90
3.2.3 Reagents	pag 91
3.2.4 Thiocholine sensors	pag 92
3.2.4.1 Preparation of Prussian Blue modified SPE	pag 92
3.2.4.2 Preparation of Cobalt Phthalocyanine bulk modified screen printed electrodes	pag 92
3.2.4.3 Preparation of the SPEs with gold film	pag 92
3.2.5 Thiocholine measurements	pag 93
3.2.6 Cholinesterase biosensor based on Prussian Blue modified SPE	pag 94
3.2.7 Acetylthiocholine and butyrylthiocholine measurement with AChE and BChE biosensors	pag 95
3.2.8 Inhibition measurement using AChE and BChE biosensors	pag 95
3.2.9 Sample collection	pag 96
3.3 Result and discussion	
3.3.1 Thiocholine sensors	pag 97
3.3.2 Cholinesterase enzyme biosensor based on Prussian Blue modified SPE	pag 102

3.3.2.1 AChE biosensor	pag 102
3.3.2.2 BChE biosensor	pag 104
3.3.2.3 Pesticide determination using AChE and BChE biosensors	pag 106
3.3.4 Waste and river water measurements	pag 110
3.4 Conclusions	pag 111

Chapter IV: TOWARDS A NERVE GAS SENSOR FOR SECURITY PURPOSES: A SOLUTION PROVIDED BY ANALYTICAL CHEMISTRY FOR FAST DETECTION OF NERVE AGENTS USING COST EFFECTIVE, FAST FIELD INSTRUMENTS AND SENSITIVE PROBES

4.1 Introduction	pag 116
4.2 Experimental section	pag 119
4.2.1 Reagents	pag 119
4.2.2 Apparatus	pag 119
4.2.3 Preparation of Prussian Blue (PB) modified SPE	pag 120
4.2.4 Preparation of a biosensor based on PB-SPE	pag 120
4.2.5 Preparation of Sarin and VX solutions	pag 121
4.2.6 Preparation of Sarin gas	pag 121
4.2.7 Biosensor enzymatic activity measurement	pag 122
4.2.8 Stability of BChE immobilized onto PB-SPE	pag 123
4.2.9 Paraoxon standard solution measurements	pag 123
4.2.10 Sarin and VX solution measurements	pag 123
4.2.11 Sarin gas measurements	pag 124
4.2.12 Safety considerations	pag 124
4.3 Results and discussion	pag 124
4.3.1 Biosensor based on PB-SPE	pag 124

4.3.2 The BChE biosensor	pag 126
4.3.3 Preliminary studies: paraoxon determination using BChE biosensors	pag 127
4.3.4 Sarin and VX determination using the BChE biosensor	pag 129
4.3.5 Sarin gas measurements	pag 130
4.4 Conclusions	pag 134

Chapter IV: A RAPID METHOD FOR AFLATOXIN B DETECTION BASED ON ACETYLCHOLINESTERASE INHIBITION

5.1 Introduction	pag 139
5.2 Experimental section	pag 141
5.2.1 Apparatus and reagents	pag 141
5.2.2 Measurement of cholinesterase activity	pag 142
5.2.3 Measurement of the effect of methanol on Ellman's reaction	pag 142
5.2.4 Measurement of the effect of methanol on AChE activity	pag 143
5.2.5 Measurement of the effect of methanol on AChE inhibition	pag 143
5.2.6 Measurement of aflatoxin stock solution	pag 144
5.2.7 Spiked barley sample preparation and extraction	pag 144
5.2.8 Measurement of AFB ₁ in barley	pag 145
5.3 Result and discussion	
5.3.1 Aflatoxin inhibition on different ChEs	pag 145
5.3.2 Mechanism of the AChE inhibition by AFB ₁	pag 146
5.3.2.1 Measurement of AChE activity	pag 146
5.3.2.2 The reversibility of the AChE inhibition by AFB ₁	pag 146
5.3.2.3 Study of the type of the AChE inhibition by AFB ₁	pag 147
5.3.3 Optimization of the AFB ₁ assay based on AChE inhibition	pag 149
5.3.4 Effect of pH	pag 150

5.3.5 Effect of temperature on enzyme activity in storage condition	pag 151
5.3.6 Study of methanol effect	pag 152
5.3.7 Calibration curve	pag 156
5.3.8 Cross-reactivity	pag 156
5.3.9 AFB ₁ measurement in fortified barley samples	pag 157
5.4 Conclusions	pag 158
General conclusions	pag 163
